The statistics in this volume were prepared, under the direction of the Foreign Trade Division, Economic Operations, Machine Tabulation, and Administrative Service Divisions. The persons contributing most directly to this publication are listed below:

Foreign Trade Division: Import Branch, Dino S. Villa, Chief; Shirley Dungee, Assistant Chief; Classification and Codes, John R. Anglin; Publications, Emanuel A. Lipscomb; Special Investigations and Regulations, Sadie Bayne. Economic Operations Division: Clerical Processing Branch, Wesley R. Grier, Chief; Procedures Branch, Nathan Lesowitz, Chief; Methods Evaluation and Determination Branch, Samuel Schweid, Chief; Electronic Programming Branch, Jack A. Scharff, Chief; Nathaniel Swersky, Assistant Chief; Foreign Trade Section, Caromel Wooten, Chief; New York Office, Emily H. Laut, Chief. Machine Tabulation Division: Foreign Trade Section, Mabel Shelton, Chief. Administrative Service Division: Graphics Branch, Robert H. Brooks, Chief; John F. Lanham, Assistant Chief.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly and Annual Coverage

In general, the compiling procedures provide for the inclusion of shipments in the statistics for the month of import. However, because of processing problems, there has always been a carry-over, of a few percent, of shipments from their proper month to a subsequent month, usually the following month. Normally, the amount of the carry-over from month to month (and from year to year) remain substantially constant. In March 1958, the amount of the carry-over was increased in order to take full advantage of early release dates made possible with the use of electronic equipment for processing import data.

Since the increased carry-over, beginning March 1958, is not compensated for in the 1958 statistics by a corresponding amount being carried over from 1957 to 1958, the 1958 statistics are not strictly comparable with annual data for prior years. However, the additional carry-over amounts to less than one percent of the 1958 annual total. The amount of carry-over will of course vary from commodity to commodity. Some indication of the carry-over by commodity for the month of March was presented in the March 1958 issue of FT-110.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT-800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel(not included in this report) are also compiled and presented in summary form in Report No. FT-985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT-985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Import of Merchandise for Consumption by Subgroup table on page 8 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries. (See Section A of the "Explanation of the Sampling Procedure..." which follows this General Explanation.)

There are substantial difficulties to be faced in obtaining the correct commodity classification in terms of the Schedule A classifications. When more than one classification is provided in Schedule A for commodities subject to the same tariff treatment (i.e., tariff classification and rate of duty) importers are not always likely to use the correct Schedule A commodity code number but may use the first number found for a series of classifications which appears to be applicable. While the more obvious errors in the statistical classifications of commodities by importers may be found during the processing of the statistics, a number of errors may go undetected, especially if the description of the merchandise shown on the entry is too general to specifically

identify the proper commodity classification yet does not appear to be in contradiction with the commodity classification number assigned by the importer.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data and are also excluded from this report. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which will be available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading, or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from, but not originating in, merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

SPECIAL NOTICE

DATA ON IMPORTS OF STAINLESS STEEL TABLE FLATWARE AND RELATED COMMODITIES RE-CLASSIFIED FOR JANUARY-APRIL 1958

The Schedule A commodity classifications listed below do not appear in this report. These classifications, shown in the January-April 1958 monthly reports were discontinued effective May 1, 1958.

6130 700	6130 740	6130 780	6130 820
6130 710	6130 750	6130 800	6130 830
6130 720	6130 760	6130 810	6200 970
6130 730			

Data reported in the import statistics under the above commodity classifications during the months of January-April 1958 have been reclassified and included in the annual totals shown for the following Schedule A commodity classifications which were announced on April 15, 1958 in Public Bulletin A-1, Changes in Schedule A, Statistical Classification of Commodities Imported into the United States:

6130 703	6130 734	6130 767	6130 817
6130 706	6130 737	6130 771	6130 821
6130 709	6130 741	6130 774	6130 824
6130 712	6130 744	6130 777	6130 831
6130 715	6130 747	*6130 779	6130 834
6130 718	6130 751	6130 781	6130 837
6130 721	*6130 752	6130 784	6130 839
6130 724	6130 754	6130 787	6130 844
*6130 725	6130 757	6130 791	6130 847
6130 727	6130 761	*6130 799	6130 849
6130 731	6130 764	6130 814	6130 851
			6200 960

Commodity numbers 6130 725, 6130 752, 6130 779 and 6130 799 (indicated with an asterisk*) do not appear in Schedule A, but represent arbitrary classifications set up in November 1958. (See the November and December 1958 monthly issues of Report No. FT-110 for further information on these arbitrary classifications.)

The January-April data were reclassified in the statistics on the basis of information contained on questionnaires used to develop separate data on imports of stainless steel table flatware. A detailed explanation of the reclassification procedures was published as a part of the special report, United States Imports for Consumption and General Imports of Table Flatware Wholly of Metal and in Chief Value Stainless Steel, Commodity by Country of Origin, Revised, January-April 1958 (Cumulative), released by the Bureau on March 13, 1959. A limited number of copies of this report are available upon request.

EXPLANATION OF THE SAMPLING PROCEDURE FOR ESTIMATING LOW VALUED IMPORTS, 1958

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States import statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. COVERAGE OF COMMODITY STATISTICS

Effective January 1958 the coverage of the detailed commodity statistics has been broadened to include on a fully compiled basis all formal entry imports individually valued $100-$250. The inclusion of data on these $100-$250 shipments has resulted in the publication of data for some commodities which may not be comparable to the published data for prior periods. In order to provide users of the statistics with some measure of change in comparability in the detailed commodity statistics supplemental data were compiled on the dollar value of the $100-$250 formal entry transactions for the month of January and published as an appendix to the January 1958 monthly issue of this report.

Prior to 1958 some indication of the undercounting in the commodity data contained in the body of this report as a result of the exclusion of low value shipments was provided on a commodity basis without regard to country at the end of this report in the form of Appendix B. Comparable data for 1958 for the sample transactions (formal entry shipments valued $1 to $99 and informal entry shipments valued $1 to $250) have not been summarized for publication in this report since there is some question as to whether these data are of general interest. (See the Supplement to this report.) Based on 1957 data (retabulated to reflect changes in sample coverage instituted January 1, 1958) the commodity totals in this report are footnoted where the low value import shipments apparently have some effect on the total shown in the body of this report for the particular commodity.

C. COVERAGE OF COMMODITY GROUP AND COMMODITY SUBGROUP TOTALS

Beginning January 1958 the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity number 9999 500 and arbitrary commodity subgroup 99 in Group 9. Prior to January estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals.

The change in sampling procedure and exclusion of the estimated value for low value shipments from the appropriate commodity group totals may result in understating the value of commodity group totals for other than group 9 by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent.

The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low value shipments is no more than about five percent except for subgroup 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (The commodity subgroup totals formerly presented in the body of this report are now shown separately in the table on page 8.)

D. THE ESTIMATING PROCEDURE

For imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500
2. Arbitrary Customs District code 99 as "Formal entry $1-$99, and informal entry $1-$250 shipments" (not shown in this report but published in FT-970-I)
3. Arbitrary commodity subgroup code 99 (shown in this report in the table on imports by subgroup as "Estimated formal entry $1 to $99 and informal entry $1 to $250 shipments," and published in FT-120 as "LOW VALUE DOLLAR EST")
4. Individual country codes as shown in Schedule C
5. The economic class for "Finished manufactures" (not shown in this report but published in FT-930 I and the Quarterly Summary of Foreign Commerce of the United States).

E. ACCURACY OF THE SAMPLE ESTIMATES REPORTED UNDER SCHEDULE A COMMODITY NUMBER 9999 500

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given. (In this report the number of documents selected in the sample is shown in the quantity column opposite the commodity and country estimates.)

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000).

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1-$100 and informal entries valued at $1-$250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

F. CHANGES IN COVERAGE AND COMPILING PROCEDURES REFLECTED IN RECENT YEAR'S ISSUES OF REPORT NO. FT 110 ARE SHOWN BELOW:

Year	Coverage and procedure
1952 and prior years	Fully compiled formal entry items by seven-digit commodity numbers. Informal entry items (valued $100 or less) excluded.
1953: January-June	Fully compiled formal entry items by seven-digit commodity numbers. Informal entry items (valued $100 or less) excluded.
July-December	Fully compiled formal entry items valued $100 and over by seven-digit commodity numbers. Estimated dollar value of formal entry items valued at less than $100 included in the total for commodity group 9 "Miscellaneous" and excluded from subgroup and other group totals as well as from the detailed commodity and commodity by country data. Informal entry items (valued $100 or less July and August and $250 or less September-December) excluded.
1954-1957	Fully compiled formal entry items valued $250 and over by seven-digit commodity numbers. Estimated dollar value of formal and informal entry items $250 and under distributed by, and included in the commodity group and subgroup totals.
1958	Fully compiled formal entry items valued $100 and over by seven digit commodity numbers. Estimated dollar value of formal entry items under $100 and all informal entry items summarized under arbitrary commodity number 9999 500. The estimated value is included in the total for commodity group 9 "Miscellaneous" and excluded from subgroup and other group totals as well as from the detailed commodity and commodity by country data.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively)]

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Page number	Value (dollars)

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP—Continued

(The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Page number	Value (dollars)
	GROUP 4—WOOD AND PAPER—Continued			
50	Cork and manufactures	4300000-4321900	86	9,995,709
51	Paper base stocks	4590000-4692900	87	309,353,021
52	Paper and manufactures	4711000-4799990	87	675,466,689
	GROUP 5—NONMETALLIC MINERALS			2,148,798,733
53	Coal and related fuels	5001000-5014300	91	4,530,952
54	Petroleum and products	5052100-5079100	91	1,625,426,319
55	Stone, lime, cement, gypsum and gypsum products	5080250-5193900	92	26,134,910
56	Glass and glass products	5200400-5290900	93	57,094,832
57	Clay and clay products	5300000-5390700	98	68,266,307
58	Other nonmetallic minerals and manufactures (except precious stones and imitations)	5391000-5930980	101	162,288,706
59	Precious and semiprecious stones and imitations and industrial diamonds	5950000-5958200	104	205,056,707

WASHINGTON 25, D. C.

CENSUS

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

1957 SAMPLE COMMODITY DATA

SUPPLEMENT TO REPORT NO. FT 110

United States Imports of Merchandise for Consumption.

Commodity by Country of Origin—Calendar Year 1958

Comments are requested as to whether the data in this Supplement should be continued. (See page 3 for Alternatives)

Prepared under the supervision of
J. EDWARD ELY
Chief, Foreign Trade Division
Bureau of the Census

Issued July 1959

CHANGES PROPOSED IN THE HANDLING OF INFORMAL AND UNDER $100 FORMAL ENTRIES IN THE IMPORT STATISTICS

The Bureau of the Census has recently received a suggestion to discontinue all work on informal import entries. Under current procedures information from informal import entries (which are limited in value to $250 or less) and formal entry shipments valued at less than $100 is omitted from the regular monthly and annual commodity statistics and is included in country totals on the basis of a 1% sample estimate. In addition, for 1957 and prior years annual estimates of commodity totals have been published as an appendix to the calendar year issue of Report No. FT 110. Annual commodity information for 1958 is not being compiled pending a decision as to what, if any, statistics will be compiled on these low valued shipments in the future. During 1958 there were about 1.4 million informal entries with an estimated value of about $88 million and about 350,000 formal entry shipments valued at less than $100 with an estimated value of $12 million.

Before any action is taken to discontinue or to reduce the statistics compiled for these shipments the Bureau would like to receive comments from users of the statistics. Outlined below are three alternatives for processing these low valued shipments. Comments on alternatives A, B, & C should be forwarded to the Bureau of the Census, Washington 25, D. C., by September 1, 1959. If a preference is expressed for alternative C, the only alternative under which commodity information is provided, it would be appreciated if the Schedule A commodities in which there is an interest are listed.

ALTERNATIVE A - *Discontinue all work on informal and $1-$99 formal entry shipments (no statistics of any type available)*

If there is no interest, or very little interest, in data for informal and $1 to $99 formal entry shipments, all work to compile any data on such shipments will be discontinued. Census will no longer request copies of informal entries of the Collectors of Customs and no selection or tabulation will be made of $1 to $99 formal entry shipments.

ALTERNATIVE B - *Compilation of monthly and annual over-all and country total estimates for $1-$99 formal entry shipments and informal entry shipments. (No commodity data to be published even on an annual basis.)*

Under this alternative, estimated figures would be compiled from a one percent sample of the entries for inclusion in the monthly and annual statistics under an arbitrary Schedule A commodity number with rate provision (rate of duty) code "10" for imports free of duty and arbitrary code "99" for dutiable imports. In addition, the estimates would be included in the following monthly and annual totals:

a. The over-all import total

b. The commodity group total for "Group 9-Miscellaneous" (published in FT 110, FT 120, and FT 900-I)

c. An arbitrary commodity subgroup code "99" (published in FT 110 and FT 120)

d. The country totals (published in FT 120 and FT 950)

e. An arbitrary Customs District code "99" (published in FT 970-I)

f. The economic class total for finished manufactures (published in FT 930-I and the Quarterly Summary)

Under this alternative the compilation of the estimated value figures for the above monthly and annual totals would be accomplished by either (1) taping the one percent sample of entries each month to establish estimated values by country of origin (and over-all imports) or (2) selecting the one percent sample of entries every three or six months to establish value figures by country of origin (and over-all imports) and to use these estimates as "bench marks" for estimating the values for subsequent months of the year.

No commodity data whatsoever would be compiled or published under this alternative. However, it would be possible, on a cost to the subscriber basis, to examine the one percent sample (or any other sample) of entries and compile the desired commodity detail.

ALTERNATIVE C - *Compilation of monthly and annual over-all and country total estimates, and annual estimates of imports in terms of 4-digit Schedule A commodity classifications for informal entries and in terms of 7-digit Schedule A commodity classifications for $1 to $99 formal entries.*

Under this alternative estimated value figures would be compiled for the monthly and annual over-all and country totals specified in Alternative B (above). In addition, the Bureau would plan to continue compilation of supplemental tables from the sample of informal and formal import entries on an annual basis presenting data in terms of 7-digit Schedule A commodity classifications for the $1 to $99 formal entries, and in terms of 4-digit Schedule A commodity classifications for informal entries (descriptions shown on informal entries are not sufficient to permit classification in terms of the full 7-digit Schedule A detail). These data would be similar to that shown in this Supplement and in Appendix B of the 1954 through 1957 annual issues of Report No. FT 110. It would of course be possible to compile the commodity data for only the formal entries where the 7-digit Schedule A commodity detail is available. On the other hand it should be noted that an estimated 80% of the value of informal entry shipments appear to represent commercial shipments based on name and address of the importer.

The figures shown in Report FT 110 for Schedule A No. 9999 500 (UN 100 form and UN 251 inf est) provide information as to the amounts which would have been omitted from the various country totals under Alternative A above. Separate estimates of the amounts from the under $100 formal entries and from informal entries will be furnished on request.

The table which follows in this Supplement has been prepared to provide the users of the statistics with some indication of the type of detailed commodity data which would be discontinued under Alternatives A and B above. These data are essentially a recompilation of the 1957 calendar year statistics which were published in Appendix B of the 1957 calendar year issue of Report No. FT 110. The estimated totals for the $100 to $250 formal entry shipments have been combined with the fully compiled commodity totals; the estimated totals for the $1-$99 formal entry shipments are shown separately by commodity; and the estimated totals for informal entry shipments are as originally published.

A comparison of the data shown in this Supplement with that shown in Appendix B of the 1957 annual issue of Report FT 110 will provide the user with an indication of the change in coverage between 1958 and 1957 when formal entry shipments valued $100-$250 were also estimated on the basis of a sample.

These data also may be used as a guide in determining the magnitude of the probable undercounting in the detailed commodity statistics for 1958 as a result of the exclusion of informal and $1 to $99 formal entries from the import statistics. However, only a rough measure of the undercounting is possible for any detailed commodity classification, since (1) the estimated value for $1 to $250 shipments reported on informal entries is shown only in terms of four-digit commodity groupings and not in terms of seven-digit commodity detail, and (2) all estimated values are subject to sampling variability.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION BY SEVEN-DIGIT SCHEDULE A COMMODITY FOR COMMODITIES FOR WHICH THERE WERE $1-$99 FORMAL ENTRY SHIPMENTS IN THE SAMPLE AND BY FOUR-DIGIT SCHEDULE A COMMODITY GROUPING FOR ALL OTHER CLASSIFICATIONS—CALENDAR YEAR 1957

On the basis of measures which indicate the degree of reliability to be attached to a specified value on a two-chances-out-of-three basis, the sampling variability of any value comprised solely of $1 to $99 informal or $1 to $250 informal estimates can be approximated on the basis of the value itself. Where the value is less than $5,000 the variability is in general between $4,000 and $6,000. If the value is between $5,000 and $20,000 the variability is in general between $5,000 and $10,000. If the value is between $20,000 and $100,000 the variability is in general between $10,000 and $20,000. If the value is between $100,000 and $500,000 the variability is in general between $20,000 and $40,000. The variability of values of $500,000 and over is generally less than 7 percent. If a fully compiled figure is added to an estimated value, the absolute sampling variability of the sum is the same as the absolute sampling variability of the estimated figure alone.

A rough estimate of the value of total imports on a commodity basis can be obtained by adding the estimated $1 to $99 shipments to the commodity totals shown for shipments valued $100 and over, plus an allowance for sampling variability, in accordance with the examples given below. However, caution should be used in adding to the data for any particular seven-digit classification the value of shipments on informal entries which is provided only in terms of the four-digit commodity grouping. It is not known if all, part, or any, of the value of the informal entries represents a particular seven-digit commodity classification within the four-digit grouping. The users own knowledge of the usual pattern of shipments on informal entries may enable him to make a rough approximation of the distribution among the seven-digit classifications of the value of shipments on informal entries.

Example (1) Total imports of commodity 0010 600 may be estimated as follows: The estimated value of $21,200 for formal entry $1 to $99 shipments plus all, or a part (if any) of informal entry shipments estimated at $3,000. If it is assumed (based on the user's knowledge of the importing pattern) that informal entry importations are distributed among the 7-digit classifications within the 4-digit grouping in the same general pattern at the $1 to $99 formal entry shipments, then $21,200 plus approximately $1,000 (assumed informal entries) equals about $22,000 estimated total formal and informal shipments. With allowance for sampling variability of about $10,000 it might be assumed that informal and $1 to $99 formal entry shipments of commodity number 0010 600 would not be greater than $32,000 or less than $12,000, and that total imports of commodity 0010 600 would probably not be greater than $423,000 or less than $403,000.

Example (2) Commodity 0025 900 is not listed, but is included in the 4-digit grouping "Other 0025" because there were no formal entry $1-$99 shipments selected in the sample for this commodity. By reference to the 1957 annual FT 110, it is determined that the fully compiled total for imports of commodity 0025 900 amounted to $1,463. Since there were no $1 to $99 formal entry shipments included in the sample for 0025 900, formal $1 to $99 shipments for this commodity probably were not greater than $2,000. Because of the higher value limits for informal shipments than for sampled formal entries, it would not be possible to determine the probable distribution of the informal estimate for grouping 0025 among the individual 7-digit commodities without some specific knowledge of the importing pattern for commodities in the 4-digit grouping.

Commodity (detailed seven-digit classification or four-digit grouping)	Formal shipments valued $100 and over[1] (dollars)	Estimated shipments: $1 to $99 formal entries (dollars)	Estimated shipments: $1 to $250 informal entries[2] (dollars)

*No estimate for "Estimated shipments" is shown because either no $1 to $99 formal or $1–$250 informal items appeared in the sample. Statistical measures indicate that the resulting undercounting may be as much as $2,000. However, for commodities not ordinarily imported in "Low valued" shipments, the figures in the table may be accepted as substantially correct. See Appendix B of the 1957 Calendar year issue of Report No. FT 110 for further information concerning the reliability to be attached to individual commodity and commodity grouping totals.

**This 4-digit commodity grouping includes one or more 7-digit Schedule A commodity numbers which were shown separately in Appendix B of the 1957 annual issue of Report No. FT 110 and are footnoted in the 1958 annual FT-110. These commodity numbers are not being shown because all formal entry items selected in the sample were individually valued $100–$250. For a complete list of the commodity numbers not shown in this supplement and the estimated value of the sampled formal shipments, see Appendix B of the 1957 annual FT-110.

[1]Data for "Formal shipments valued $100 and over" include fully compiled totals for shipments valued $250 and over, plus an estimate of the value of $100–$250 formal shipments based on a five percent sample.

[2]The data shown are for only those informal entries which contained commodity descriptions detailed enough to permit presentation of the data by 4-digit classifications. Excluded are those informal entries on which the description of the merchandise was not specific enough to permit presentation of the data except in terms of (1) commodity subgroup (i.e., groupings of 4-digit classifications), or (2) an arbitrary catch-all classification ("other 1–250 dollar items) which has been set up as a separate commodity subgroup. (See Appendix B of the 1957 annual FT-110 for these totals.)
